

## Olympic Legacy Grant 2015 - 2016

All schools have received money from the Olympic Legacy to support both sport/physical activities and healthy lifestyles in schools. The money is to support all children and encourage them to take more physical activity and lead healthier lifestyles, which in turn will assist in raising attainment and increase positive attitudes to learning.

We have been able to purchase a variety of equipment, some replacements and some new items to engage the children's enthusiasm. With more equipment and training we have also engaged more of our parents in supporting clubs, which we now have equipment for. We also have bought in workshops for our Key Stage Two children to be engaged in learning about how to lead healthier lifestyles; this has included a session for staff to support this learning.

In 2014 – 15 in addition to the activities listed below we also funded Quidditch Tournaments, Healthy Lifestyle workshops (x6) and transport to enable children to visit a Big Green Day, Tag Rugby club and festival, Cheerleading Club, Forest School Taster Day for all teachers and 6 week course for children to attend Forest School with an accompanying teacher.

Some activities are open to all children while others are targeted for specific children. For example Forest School was used to build on children's self-esteem, building resilience, working together and taking on responsibility and leadership. The children who attended have shown a real improvement in their self-image which in turn will impact on learning. Change 4 Life Club will be supporting children who dislike physical activity, but will be active through fun activities and challenges which get them moving. An improvement in fitness levels should impact on their ability to learn and through developing healthier bodies.

In 2015/16 autumn & spring terms the school has received £4909.00 in sports premium. The money will help to fund:
